Influenza A&B

Common cold, influenza or COVID-19?

**Make the difference for early
choice of proper treatment.**

Cough, fever, and muscle ache are all typical and common symptoms of respiratory infections. Making the correct and timely diagnosis between common cold, influenza, or COVID-19 is challenging, yet important as the treatment and precaution measures may be different.

With the Actim SARS-CoV-2 + Actim Influenza A&B rapid test distinguishing between the respiratory infections is simple, quick, and accurate. Only a single nasopharyngeal sample is required to perform both the tests and the results are obtained immediately.

The test is designed to make testing as simple as possible: no need to dispense a buffer, since the test kit already contains pre-filled buffer tubes. Thanks to the practical product format, the tubes from one package can be distributed to different testing sites - no laboratory equipment or cold storage is needed.

Actim SARS-CoV-2 + Actim Influenza A&B rapid test

Differentiates between COVID-19, influenza A and B infections

Fast results on the spot, no laboratory equipment needed

The test results are ready in 10 and 15 minutes

100% made in Finland

**Actim Influenza A&B test is highly specific 99%
and sensitive 90% for influenza A subtype.**

Clear, visible results in minutes

Actim SARS-CoV-2 is a virus antigen detection test giving highly reliable results for diagnosing an acute COVID-19 infection. The test is highly specific for the novel coronavirus and it is proven to detect all widely known variants such as the Alfa, Beta, and Delta variants.

Actim Influenza A&B test detects and differentiates between influenza A and B virus antigens with top-class reliability. The test detects various influenza A subtypes, including swine and avian flu and it is not affected by yearly virus strain changes.

Actim SARS-CoV-2 has excellent sensitivity of 100% (Ct <29) and specificity of 100%.
