Influenza A&B

Common cold, influenza or COVID-19?

Make the difference for early
choice of proper treatment.

Cough, fever, and muscle ache are all typical and common symptoms of respiratory infections. Making the correct and timely diagnosis between common cold, influenza, or COVID-19 is challenging, yet important as the treatment and precaution measures may be different.

With the Actim SARS-CoV-2 + Actim Influenza A&B rapid test distinguishing between the respiratory infections is simple, quick, and accurate. Only a single respiratory sample is required to perform both the tests and the results are obtained immediately.

The test is designed to make testing as simple as possible: no need to dispense a buffer, since the test kit already contains pre-filled buffer tubes. Thanks to the practical product format, the tubes from one package can be distributed to different testing sites - no laboratory equipment or cold storage is needed.

Actim SARS-CoV-2 + Actim Influenza A&B rapid test

Differentiates between COVID-19,
influenza A and B infections

Fast results on the spot, no
laboratory equipment needed

The test results are ready
in 10 and 15 minutes

100% made in Finland

Actim Influenza A&B test is highly specific 99%
and sensitive 90% for influenza A subtype.

Clear, visible results in minutes

Actim SARS-CoV-2 is a virus antigen detection test giving highly reliable results for diagnosing an acute COVID-19 infection. The test is highly specific for the novel coronavirus and it is proven to detect all widely known variants such as the Alfa, Beta, and Delta variants.

Actim Influenza A&B test detects and differentiates between influenza A and B virus antigens with top-class reliability. The test detects various influenza A subtypes, including swine and avian flu and it is not affected by yearly virus strain changes.

Actim SARS-CoV-2 has excellent sensitivity of 100% (Ct <29) and specificity of 100%.
